### WORK EXPERIENCE

#### Gobierno de la Ciudad de Buenos Aires - Data Analyst ( Mar 2023 - Present )

- Preparation of daily, weekly, monthly, and annual reports for the Park Rangers Directorate, consolidating operational information and survey data from plazas and green spaces.
- Analysis of space usage, visitor flow, and the overall condition of plazas, turning data into actionable insights for decision-making.
- Development of indicators to plan coverage and estimate the required number of park rangers based on hectares, demand, and the characteristics of each space.
- Design and maintenance of dashboards in Power BI and Looker Studio, ensuring metric consistency, KPI tracking, and clear data visualizations.
- Advanced use of Google Sheets and process automation with Google Apps Script, optimizing data updates, validation, and consolidation.
- Creation of executive presentations in PowerPoint, aligned with brand guidelines, with a focus on visual clarity, analytical storytelling, and easy-to-read results.

#### Cheil Argentina (Samsung) | BI Analyst – Social Media & Members ( Nov 2025- Mar 2026 )

- Development and maintenance of dashboards in Power BI and Looker Studio to track performance KPIs by campaign, period, and channel.
- Strong expertise in Power BI, with experience in ETL processes, data modeling, and the development of advanced metrics in DAX.
- Data integration and transformation using SQL, Power Query, Excel, and Google Sheets, ensuring data consistency, traceability, and quality.
- Automation of reporting, update, and validation processes using Google Apps Script, reducing operational time and manual tasks.
- Monitoring of B2B content and analysis of metrics from platforms such as Samsung Members, including Active Users, Registered Users, Banner Metrics, and interaction performance.
- Development of landing pages and lightweight HTML/CSS/JS assets for campaigns and activations, with a focus on responsive implementation and measurement.

### **Molinos Tarquini - BI Analyst ( Jun 2025 – Aug 2025 )**

- Automation of periodic reports for the commercial area, improving operational efficiency, reducing delivery times, and optimizing processes.
- Analysis of sales performance by salesperson, region, and sector, identifying opportunities for optimization and growth.
- Development of dashboards and strategic reports in Power BI, Excel, and CRM to support data-driven decision-making.
- Collaborative work with Sales, Marketing, and Finance teams to align metrics, consolidate information, and enhance results.

### **Colcar Merbus (Mercedes-Benz) – After-Sales Administrative Analyst (Jan 2025 – Jun 2025)**

- Management and monitoring of KPIs and indicators for internal and external services, analyzing information related to requests, documentation, and operational processes.
- Development and maintenance of dashboards and reports in Power BI, Excel, and CRM, improving data visualization, accessibility, and analysis.
- Preparation of management reports to support decision-making, ensuring data consistency, quality, and traceability.
- Ongoing collaboration with Finance and Systems teams to gather requirements, define strategic metrics, and develop control dashboards focused on tracking key indicators.

---

## **EDUCATION AND CERTIFICATIONS**

### **Bachelor's Degree in Systems Analysis (Jan 2021 – Present)**

University of Buenos Aires

### **Computer and Programming Technician (Jan 2013 – Dec 2020)**

Technical School No. 36 "Almirante Guillermo Brown"

### **Power BI Certification (Aug 2025)**

Santander Academy

---

## **TECHNICAL SKILLS**

- BI & Reporting: Design and maintenance of dashboards and reports, KPI reporting, performance analysis, and insight generation to support decision-making.
- Power BI: DAX, Power Query, data modeling (relationships), interactive visualizations, and report optimization.
- Excel / Google Sheets (Advanced): Power Query, pivot tables, advanced functions, report structuring, and data control.
- SQL & ETL: Querying (joins, aggregations), lightweight ETL processes, source integration, and data quality management.
- Automation: Google Apps Script for report updates, validations, data consolidation, and reducing manual tasks.
- Additional Skills: Data extraction from CRM, documentation and presentations (Microsoft / Google Workspace), and HTML/CSS/JS for responsive assets and landing pages.
